

NOTICE
THE JOURNAL OF INTERNATIONAL AUDIOLOGY

Vol. I 1962 no. 1 and 2.

The preprints of the three topics of the round tables, exposed by 15 outstanding scientists are published in no. 1. This number was sent to all members of the society before the beginning of the congress.

Preceding this congress in the scope of the Leiden University post-graduate programme, a Boerhaave Course was organized on the **Practice of Audiological Tests** in the E.N.T. clinic. As much as possible these tests were demonstrated and described by their original inventors. These descriptions 35 in total, are published in the second number of Vol. 1.

Vol. II 1963 no. 1 and 2.

This year again a volume of two numbers, containing the proceedings of the 6th Congress is planned. The present number contains the discussion of the round tables and the associated papers whereas the second number will contain free contributions to the Congress and papers we received after the Congress.

Vol. III.

It is felt by the publishers, because of the growing interest in our journal, that 2 numbers will not be sufficient. So, if possible, we plan to have four numbers in 1964. The great advantage will be that free papers can be published without too much delay. The first two numbers will contain a.o. the preprints of the Copenhagen congress.
